Statement:

As a part of the community and resort I consider it important to give time and effort to help develop this area into a premier residential and vacation site. Having served on the amenities committee has given me insight into the potential the future holds. By working with the resort to improve and maintain the current amenities, and develop new amenities, it is my belief that the quality of the resort and our properties will be maintained and increase. It is with in mind that I have decided to run for the AAFPO board.
